

By-Laws Report June 2011

Along with requesting input from each Board member regarding changes the By-law committee is also looking at how the By-laws are actually written. What they say. With the difficulties in interpreting the By-Laws with the past election and some problems concerning committee placements the new board is looking at how the By-laws are written so there will be no further confusion. We are trying to make them more clear for the members as well as the Board of Directors. This will be a long process, but we hope to have a definite change for members by year end If any member would like to review the By-laws and give input or even make suggestions that might make us stronger in our goals, please contact Otis Knighten, chair of this committee.
